# Rhino

**Medium: Bronze**

**Dimensions: 4"H x 3"W x 15"L**

**Limited edition of 9**

The rhino almost seems like a remnant from prehistoric times with its massive body, armor-like skin, heavy horns and three distinct toes. He's actually a relative of the horse and moves in the same way, with almost the same agility, so don't underestimate him. There is a unique beauty in all life forms, no matter how unusual they may be, and we must strive to ensure their existence if for nothing else but to enhance our own lives.
